

STATISTICAL DATABASE CODEBOOK

Organizational Adaptation, Task Complexity, and Effective Administration of Unemployment Programs in the American States (Version 07/14/2024)

Variable Name: Description

STATE-MONTH IDENTIFIERS

<i>state</i>	State Name.
<i>st_postal</i>	The two-letter FIPS state abbreviation.
<i>stateid</i>	Numerical Identifier for State Name.
<i>year</i>	Year, ranging from 2002 to 2023.
<i>month</i>	Month (January – December).
<i>monthnum</i>	Month in numerical format, ranging from 1 to 12.
<i>monthyear</i>	Month-Year Identifier ‘time counter’ based linear trend in numerical format for each time series observation per state panel [Starting with “1” (January 2002) and ending with “260” (August 2023)].

DEPENDENT VARIABLES

totalerror_rat	Total error rate. Measured as the sum of t1error_rat (type I error rate) and t2error_rat (type II error rate), sample weighted. This measure only includes errors that are attributable to state UIP agencies.
-----------------------	--

$$\left(\frac{\text{Overpayment Error}}{\text{Paid Claims Sample}} \right) + \left(\frac{\text{Underpayment Error}}{\text{Paid Claims Sample}} \right) + \left(\frac{\text{Underpayment Error}}{\text{Denied Claims Sample}} \right) + \left(\frac{\text{Erroneous Denial}}{\text{Denied Claims Sample}} \right)$$

t1error_rat Total Type I error rate. Computed as **errtype1_agencyct/totalct_pc**. This measure only includes errors that are attributable to state UIP agencies.

$$\left(\frac{\text{Overpayment Error}}{\text{Paid Claims Sample}} \right)$$

abst2error_rat Total Type II error rate (sample weighted). Measured as the sum of **t2error_pcrat** (type II error rate in the paid claims sample) and **t2error_dcrat** (type II error rate in the denied claims sample). This measure only includes errors that are attributable to state UIP agencies.

$$\left(\frac{\text{Underpayment Error}}{\text{Paid Claims Sample}} \right) + \left(\frac{\text{Underpayment Error}}{\text{Denied Claims Sample}} \right) + \left(\frac{\text{Erroneous Denial}}{\text{Denied Claims Sample}} \right)$$

rel2error_rat Relative Type II error rate (sample weighted). Computed as the total type II error rate (**abst2error_rat**) over the total error rate (**totalerror_rat**). This measure only includes errors that are attributable to state UIP agencies.

$$\frac{\text{Type II Error Rate}}{[\text{Type I Error Rate} + \text{Type II Error Rate}]} = \frac{\text{abst2error_rat}}{[\text{abst2error_rat} + \text{t1error_rat}]}$$

totalaccuracy_rat Total accuracy rate (sample weighted). Measured as the sum of the proportion of payments without any agency error in the paid claims sample and the proportion of payments without any agency error in the denied claims sample. Computed as the sum of **correct_pc_agencyct/totalct_pc** and **correct_dc_agencyct/totalct_dc**.

$$\left(\frac{\textit{Correct Payment}}{\textit{Paid Claims Sample}} \right) + \left(\frac{\textit{Correct Denial}}{\textit{Denied Claims Sample}} \right)$$

t2underp_pcrat Type II error rate in the paid claims sample. This measure only includes errors that are attributable to state UIP agencies.

$$\left(\frac{\textit{Underpayment Error}}{\textit{Paid Claims Sample}} \right)$$

t2error_dcrat Type II error rate in the denied claims sample. This measure only includes errors that are attributable to state UIP agencies. {APPENDIX E ONLY}

$$\left(\frac{\textit{Underpayment Error}}{\textit{Denied Claims Sample}} \right) + \left(\frac{\textit{Erroneous Denial}}{\textit{Denied Claims Sample}} \right)$$

t2underp_dcrat Type II error rate for only underpayment errors in the denied claims sample. This measure only includes errors that are attributable to state UIP agencies.

$$\left(\frac{\textit{Underpayment Error}}{\textit{Denied Claims Sample}} \right)$$

t2denial_dcrat Type II error rate for only erroneous denials in the denied claims sample. This measure only includes errors that are attributable to state UIP agencies. {APPENDIX E ONLY}

$$\left(\frac{\textit{Erroneous Denial}}{\textit{Denied Claims Sample}} \right)$$

totalct_pc Total number of cases in the paid claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

totalct_dc Total number of cases in the denied claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

errtype1_agencyct Total number of cases with Type I errors (overpayment) that are attributable to the state UIP agency in the paid claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

errtype2_pc_agencyct Total number of cases with Type II errors (underpayment) that are attributable to the state UIP agency in the paid claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

err_agencyct_dc Total number of cases with Type II errors (either underpayment or erroneous denial) that are attributable to the state UIP agency in the denied claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

t2underp_agencyct Total number of cases with Type II underpayment errors that are attributable to the state UIP agency in the denied claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

t2denial_agencyct Total number of cases with Type II erroneous denial errors that are attributable to the state UIP agency in the denied claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

correct_pc_agencyct Total number of correct payment cases in the paid claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

correct_dc_agencyct Total number of correct payment cases in the denied claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

errboth_agencyct Total number of cases with both Type I and Type II errors (overpayment for partial weeks and underpayment for other partial weeks) that are attributable to the state UIP agency in the paid claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

Note: Denied claims sample consists of either Type II error or no error.

botherrors_rat Proportion of cases with both Type I and Type II errors (overpayment for partial weeks and underpayment for other partial weeks) that are attributable to the state UIP agency in the paid claims sample in a

given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

Note: Denied claims sample consists of either Type II error or no error.

t1_agencyamt_month Total amount of Type I errors that are attributable to the state UIP agency in the paid claims sample in a given state-month.

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

t1_avgamt Average amount of Type I errors that are attributable to the state UIP agency in the paid claims sample in a given state-month. Computed as **t1_agencyamt_month/errtype1_agencyct**.

t1_avgamt_real Average amount of Type I errors that are attributable to the state UIP agency in the paid claims sample in a given state-month (in real dollar amount). Computed as **t1_agencyamt_month/(cpi2010june/100)**.

cpi2010june Consumer Price Index (Seasonally Adjusted). Base period is 2010 June.

Source: Bureau of Labor Statistics. Consumer Price Index for All Urban Consumers (CPI-U).

‘ORGANIZATIONAL ADAPTATION’ COVARIATES

itmod_projectstart String variable indicating the specific month-year when IT modernization is under development prior to activation (project start date of the state UIP agency’s IT Modernization reform).

Source: Compiled by authors from various online sources. A comprehensive list is available upon request from the authors.

itmod_projectstartmonth A time counter variable that equals “1” for the first month of IT modernization project in state *i*, *monthyear t*;; “*m*” for the *mth* month of IT modernization project prior to activation of the IT system observed in state *i*, year *t*.

itmod_adoption String variable indicating the specific month-year when IT modernization is activated with citizen access.

Source: Compiled by authors from various online sources. A comprehensive list is available upon request from the authors.

itmod_adopt_state A binary indicator of “1” if the state has implemented IT modernization reform in between the sample period, 2002 January – 2022 June.

Source: Compiled by authors from various online sources. A comprehensive list is available upon request from the authors.

itmod_monthcount A time counter variable that equals “0” before the activation of IT modernization in state *i*, *monthyear t*; “1” for the first month of IT modernization in state *i*, *monthyear t*;; “*m*” for the *mth* month of IT modernization observed in state *i*, year *t*;

Source: Compiled by authors from various online sources. A comprehensive list is available upon request from the authors.

itmod_vendor The name of vendor that signed contract with the state UI agency for the IT modernization.

Source: Compiled by authors from various online sources. A comprehensive list is available upon request from the authors.

itmod_vendor_id Numerical Identifier for Vendor Name. Basis for Vendor Unit Effects.

itmod_start_adopt Categorical variable indicating the progress of IT modernization reform in a given *monthyear t* state *i*.

- **0:** Pre-Project Start Date & Pre-Launch Date
- **1:** Post-Project Start Date & Pre-Launch Date
- **2:** Post-Project Start Date & Post-Launch Date

projectduration

Project duration computed as the total number of months spent on IT modernization project prior to the go-live month.

‘TASK COMPLEXITY’ COVARIATES

tot_interstate **Proportion of claims involving Inter-State Claimants based on a sample-weighted average of Paid Claims and Denied Claims samples, respectively. [Total Program Error Rate & Type II Program Error Rate Models]. Monthly**

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

t1_interstate **Proportion of claims involving Inter-State Claimants based on Paid Claims sample. [Type I Program Error Rate Models]. Monthly.**

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

dt2_interstate **Proportion of claims involving Inter-State Claimants based on Denied Claims sample. [‘Disaggregate’ Type II Program Error Rate Models]. Monthly. APPENDIX E ONLY**

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

tot_extbenefits **Proportion of claims involving Extended Benefit Program Recipient Claimants based on a sample-weighted average of**

Paid Claims and Denied Claims samples, respectively. [Total Program Error Rate & Type II Program Error Rate Models]. Monthly

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

***t1_extbenefits* Proportion of claims involving Extended Benefit Program Recipient Claimants based on Paid Claims sample. [Type I Program Error Rate Models]. Monthly.**

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

***dt2_extbenefits* Proportion of claims involving Extended Benefit Program Recipient Claimants based on Denied Claims sample. [‘Disaggregate’ Type II Program Error Rate Models]. Monthly. APPENDIX E ONLY**

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

***tot_diffoccupseek* Proportion of claims involving Different Occupation Seeking Claimants based on a sample-weighted average of Paid Claims and Denied Claims samples, respectively. [Total Program Error Rate & Type II Program Error Rate Models]. Monthly**

Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].

***t1_diffoccupseek* Proportion of claims involving Different Occupation Seeking Claimants based on Paid Claims sample. [Type I Program Error Rate Models]. Monthly.**

CONTROL COVARIATES

gouparty Governor's political party. Categorical variable indicating political affiliation of the governor in each state. Annual.

- 1 : D (Democrat)
- 0 : I (Independent)
- -1 : R (Republican)

Source: The Book of the States. 2002-2021.

demgouparty Democratic Governor Binary Indicator. Annual.

- 1: Democratic Governor
- 0 : Otherwise (Independent or Republican Governor)

Source: The Book of the States. 2002-2021.

repgouparty Republican Governor Binary Indicator. Annual.

- 1: Republican Governor
- 0 : Otherwise (Independent or Democratic Governor)

Source: The Book of the States. 2002-2021.

<i>electionyear</i>	Binary indicator of “1” if there is a gubernatorial election in a given state for a given year, “0” otherwise. Annual. <i>Source: The Book of the States. 2002-2021.</i>
<i>workload</i>	Total number of initial claims. Monthly. <i>Source: ETA-5159 Report.</i> https://oui.doleta.gov/unemploy/DataDownloads.asp .
<i>ln_workload</i>	Natural Logarithm of <i>workload</i> variable. Monthly. <i>Source: ETA-5159 Report.</i> https://oui.doleta.gov/unemploy/DataDownloads.asp .
<i>agencypersonnel</i>	Total number of staff. Annual. <i>Source: U.S. Department of Labor Employment and Training Administration. “Resource Justification Model,”</i> https://oui.doleta.gov/rjm/ (Retrieval Date: 10/16/2022)
<i>automationrate</i>	Estimated proportion of claims filed through internet. <i>Source: Benefit Accuracy Measurement Survey. Publicly accessible upon request.</i>
<i>uiadmin_budget_nominal</i>	Total amount of UI administrative expenditure used by state agencies, in current dollars within a given year. Annual. <i>Source: U.S. Department of Labor Employment and Training Administration. “Resource Justification Model,”</i> https://oui.doleta.gov/rjm/ (Retrieval Date: 10/16/2022)
<i>uiadmin_budget_real</i>	Inflation-adjusted amount of total UI administrative expenditure used by state agencies within a given year. In real dollars, adjusted by GDP deflator. = (<i>uiadmin_budget_nominal</i>)/(gdp/100)

<i>benefitgenerosity1</i>	<p>The ratio of the average weekly UI benefit paid to the average weekly wage of an insured worker (Benefits Generosity by State Law). Annual.</p> <p><u>Source:</u> <i>ETA-5159 Claims and Payment Activities Report.</i> https://oui.doleta.gov/unemploy/DataDownloads.asp</p>
<i>benefitgenerosity2</i>	<p>The percentage of claimants whose regular weekly benefit amount (WBA) for a period of total unemployment is the maximum under the state law (%) (Actual Benefits Generosity). Annual. (<i>Compton, et al 2023 employ this measure</i>).</p> <p><u>Source:</u> <i>ETA-218 Benefits Rights Experience Report.</i> https://oui.doleta.gov/unemploy/DataDownloads.asp</p>
<i>econideol_median</i>	<p>State economic policy liberalism: posterior median. Higher values indicate greater liberalism. Annual. 2022, 2023 not available</p> <p><u>Source:</u> <i>Warshaw, C. and Caughey, D. "Mass Ideology and Policy Liberalism of American States from 1936-2020,"</i> http://www.chriswarshaw.com/data.php</p> <p><u>Note:</u> <i>2021 data was retrieved by request from authors (Retrieval Date: 10/28/2022)</i></p>
<i>unemp_rate</i>	<p>Average unemployment rates of a given state, seasonally adjusted within a given state-month. In percentages (%). Monthly.</p> <p><u>Source:</u> <i>U.S. Bureau of Labor Statistics- Local Area Unemployment Statistics. 2002-2023.</i> https://download.bls.gov/pub/time.series/la/la.data.2.AllStates</p>
<i>gov_name</i>	<p>Name of the state governor in a given year.</p> <p><u>Source:</u> <i>National Governors Association,</i> https://www.nga.org/former-governors.</p>

gov_tenure	Number of months that the governor has been in office in a given state for a given month-year. <i>Source: National Governors Association, https://www.nga.org/former-governors.</i>
gov_biz	Binary variable indicating whether the governor has a business background of serving in an executive position (CEO, President, Chairman, Partner Founder, Principal, and Owner/Co-Owner) in business. <i>Source: Compiled by the authors from online biographical sources. A comprehensive list is available upon request from the authors.</i>
agencyhead_name	Name of the state unemployment insurance agency head in a given year. <i>Source: Compiled by the authors from online biographical sources. A comprehensive list is available upon request from the authors.</i>
agencyhead_tenure	Number of months that the state UIP agency head has been in office in a given state for a given month-year. <i>Source: Compiled by the authors from online biographical sources. A comprehensive list is available upon request from the authors.</i>
agencyhead_biz	Binary variable indicating whether the agency head has a business background of serving in an executive position (CEO, President, Chairman, Partner Founder, Principal, and Owner/Co-Owner) in a business. <i>Source: Compiled by the authors from online biographical sources. A comprehensive list is available upon request from the authors.</i>

‘MANAGERIAL AND OPERATIONAL’ COVARIATES [“RJM” VARIABLES]

Note 1: The original RJM (Resource Justification Model State Budget Document submitted to U.S. Dept. of Labor each year) data consists of the following ten

functional categories: Initial Claims Processing, Non-Monetary Determinations, Weeks Claimed, Wage Records, Tax, Appeals, Benefit Payment Control, UI Performs, Support, and AST. Among these functions, we include only functional activities that are ‘directly’ involved in the sequential procedure, starting from the claimant filing an initial claim to the receipt of the first payment, which are ‘initial claims processing’, ‘non-monetary determinations’, and ‘support’ functions. For more information about each functional category, see ET HANDBOOK NO. 410 (6th Ed.) Appendix C (https://www.dol.gov/sites/dolgov/files/ETA/advisories/UIPL/2019/UIPL_2-20_Attachment_1.pdf).

Note 2: Variables include the following four items by each functional category.

- (i) Total hours worked.
- (ii) Total number of positions.
- (iii) Total salary
- (iv) Average salary per position

*RJM Data for FY2023 is not available until June 2024.

gov_deflator Deflator. Price index for government consumption expenditures and gross investment (Base year 2017).. 2023 not available

tot_totalnonwhite_rat	Sample weighted proportion of nonwhite claimants in the paid claims and denied claims sample in a given state-month. Computed as the sum of pcnonwhite_rat and dcnonwhite_rat for the paid claim and denied claims samples, respectively. [Total Error Rate & Type II Error Rate Models]

t1_totalnonwhite_rat	Sample weighted proportion of nonwhite claimants in the paid claims sample in a given state-month. Computed as pcnonwhite_rat in the paid claims sample. [Type I Error Rate Models]
dt2_totalnonwhite_rat	Sample weighted proportion of nonwhite claimants in the denied claims sample in a given state-month. Computed as dcnonwhite_rat in the denied claims sample. [‘Disaggregate’ Type II Error Rate Models]. APPENDIX E ONLY
tot_totalfemale_rat	Sample weighted proportion of female claimants in the paid claims and denied claims sample in a given state-month. Computed as the sum of pcfemal_rat and dcfemal_rat for the paid and denied claims samples, respectively. [Total Error Rate & Type II Error Rate Models]
t1_totalfemale_rat	Sample weighted proportion of female claimants in the paid claims sample in a given state-month. Computed as pcfemal_rat for the paid claims sample. [Type I Error Rate Models]
dt2_totalfemale_rat	Sample weighted proportion of female claimants in the paid claims and denied claims sample in a given state-month. Computed as dcfemal_rat for the denied claims sample. [‘Disaggregate’ Type II Error Rate Models] APPENDIX E ONLY
tot_totalageu25o65_rat	Sample weighted proportion of claimants whose ages are below 25 or above 65 in the paid claims and denied claims sample in a given state-month. Computed as the sum of pcageu25o65_rat and dcageu25o65_rat for the paid and denied claims samples, respectively. [Total Error Rate & Type II Error Rate Models]
t1_totalageu25o65_rat	Sample weighted proportion of claimants whose ages are below

	25 or above 65 in the paid claims and denied claims sample in a given state-month. Computed as the sum of pcageu25o65_rat for the paid claims sample. [Type I Error Rate Models]
dt2_totalageu25o65_rat	Sample weighted proportion of claimants whose ages are below 25 or above 65 in the paid claims and denied claims sample in a given state-month. Computed as the sum of dcageu25o65_rat for the denied claims sample. [‘Disaggregate’ Type II Error Rate Models]. APPENDIX E ONLY
pcpopsize_monthly	Total number of claimants receiving UI benefits in a given state-month. <i>Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].</i>
popsampamt_monthly	Total amount of UI benefits paid by state UIP agency in a given state-month sample, in nominal US dollars. <i>Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].</i>
pcpopamt_monthly	Total amount of UI benefits paid by state UIP agency in a given state-month population, in nominal US dollars. <i>Source: U.S. Department of Labor. Benefit Accuracy Measurement Survey. Publicly available upon request [Retrieval Date: 08/22/2022].</i>
pcsamp_avgamt	Average amount of UI benefits per claimant in a given state-month sample, in nominal US dollars, computed as popsampamt_monthly/pcpsampsize_monthly .
pcsamp_avgamt_real	Average amount of UI benefits per claimant in a given state-month sample, in real US dollars, computed as popsampamt_monthly/pcpsampsize_monthly divided by

cpi2010june/100.

pcpopamt_monthly_real Average amount of UI benefits per claimant in a given state-month population, in real US dollars, computed as **pcpopamt_monthly/pcpopsize_monthly** divided by **cpi2010june/100.**
